

duo

Our signature
minimalist design,
now in a double-
glazed system.

OVERVIEW

Simple. Sophisticated.

Meticulously crafted, Duo by ALUR combines refined features with enhanced sound attenuation performance, providing the privacy your space requires and the distinction you deserve. Built on the proven and highly awarded ALUR single-glazed system, every aspect of Duo encapsulates the Golden Ratio, creating an experience that is equal parts impactful and harmonious.

PERFORMANCE

Form and function—perfected.

After speaking with building and business owners, designers, architects and contractors alike, we've responded with a product designed—and tested—for your exact needs. While other glass-wall manufacturers provide STC ratings of the glass only, ALUR goes further. Additional testing is performed in the field, on the entire system, providing the most precise measure of the performance you can expect. Please contact your local ALUR representative for more information on ALUR STC and NIC ratings.

AWARDED

Golden.

Inspired by the Golden Ratio, Duo by ALUR has already proven to be the best in class as the winner of a NeoCon Gold Award for the Best Movable Wall System.

Luxurious details.

Available in clear anodized aluminum and black, white and bronze PVDF resin frame finishes with matching hardware options, Duo is designed for optimum aesthetics and performance. Duo's slim profile framing creates a modern, lighter scale look. Recessed channels give the appearance of glass floating in space. Optional concealed closer for swing doors and a soft braking mechanism for sliding doors provide enhanced luxury and function. And nowhere else will you find a double-glazed system with a double-glazed, pocket-style sliding door.

TECHNICAL FEATURES

The finer points.

Elegant door hardware perfectly complements the system design with ADA-compliant, locking and non-locking options. Integrated metal L and T connectors define room boundaries, and protect and conceal glass edges. Ultra High Bond (UHB) glazing tape unites each pane, creating a structure that is as seamless and acoustically sound as possible.

Timeless and true.

Present in matters ranging from music and the stock market to DNA and the solar system, the Golden Ratio is a timeless proportion known for creating a sense of balance and equilibrium. Visual splendor aside, the application of this mathematical principle has produced architectural icons equally as impressive in their grandeur as in their longevity. Works include the Pyramids of Giza, Notre-Dame Cathedral and the Parthenon.

Harmony in design.

Two quantities are in the Golden Ratio if their ratio is the same as the ratio of their sum to the larger of the two quantities.

$$\frac{a}{b} = \frac{a+b}{a} = 1.618... = \varphi$$
