DESIGN AESTHETICS

Modern Minimalism —Mastered.

ALUR has always embraced the philosophy that less is more, and Duo Motion reflects this mindset with a sleek, refined design that balances elegance and efficiency. Clean lines and meticulous craftsmanship shape a workspace that feels both modern and welcoming. Seamlessly integrating into any office setting, Duo Motion enhances natural light and brightens the environment, demonstrating that simplicity and sophistication go hand in hand.

||||| SOUND PERFORMANCE

Style Meets Silence.

Duo Motion's double-glazed doors, featuring high-performance seals, provide exceptional sound-dampening qualities, creating the "golden silence" essential for confidential discussions and productive brainstorming sessions. The frameless design enhances aesthetics by maximizing natural light, fostering a bright and welcoming atmosphere. With superior acoustic performance, these doors enable the seamless coexistence of public areas and private spaces.

TECHNICAL DESIGN FEATURES

Sleek Doors. Smart Design.

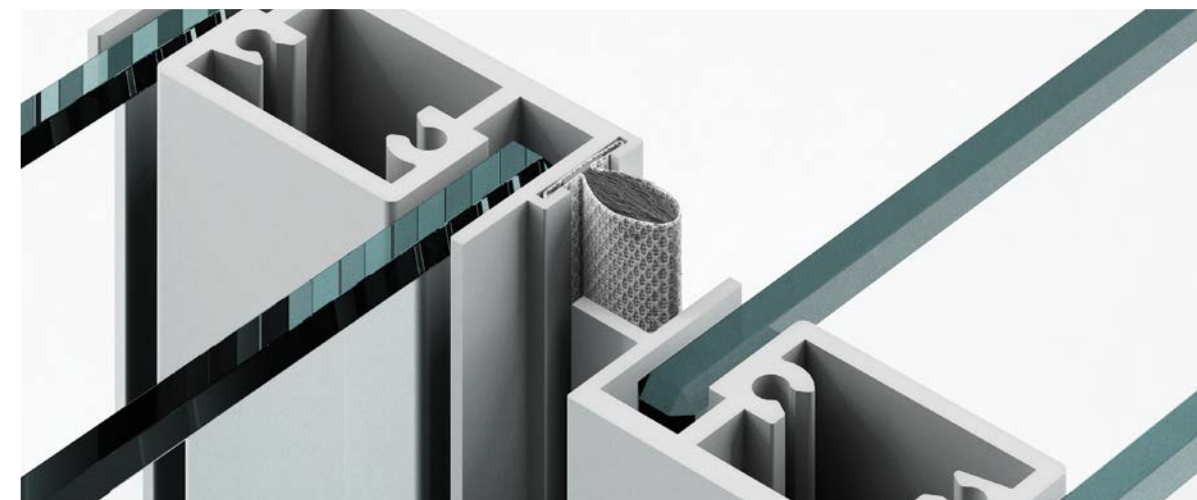

Designed for two to five doors in one direction or bidirectional configurations like 2+2 and 3+3, Duo Motion adapts easily to various spaces. Its synchronized mechanism ensures each panel pulls the next in a smooth, connected motion, allowing all doors to open and close with minimal effort. A dual-action soft-braking mechanism prevents slamming and ensures precise engagement of the door seals. This advanced design reduces effort while enhancing safety and comfort, delivering a smooth, quiet, and reliable experience.

MAXIMIZED QUALITY

Functional. Innovative. Durable.

We've perfected every detail so you don't have to. From double-glazed doors to flush-mounted recessed handles, every component of the Duo Motion system is designed to enhance functionality and elevate your office's aesthetic. Innovative door-bottom drop seals and vertical compression seals provide superior acoustic performance, ensuring quiet and privacy in every space. With a focus on quality, the system delivers lasting durability, while our expert team ensures flawless installation and a perfect fit.

BUILDING THE DUO BRAND

Seamless. Integrated. Refined.

At our core, we believe in providing fully integrated workplace wall solutions. The Duo Motion system seamlessly pairs with our Duo double-glazed system, offering a cohesive, modern aesthetic defined by clean lines and transparency. Together, they create bright, inspiring environments that strike the perfect balance between beauty and function. Building on our mission, Duo Motion elevates any office space and sets a new benchmark for contemporary design.

CONSULTATION SERVICES

Premium Performance —Guaranteed Satisfaction.

We take pride in our work and are inspired by the opportunity to create beautiful, modern, and dynamic workspaces. ALUR is dedicated to helping designers and architects select products that perfectly complement your office environment. We ensure that these products are seamlessly installed, further enhancing your workspace. Our commitment to customer satisfaction drives us to be the right partner for your needs, which is why we stand by you every step of the way.
